# Construction Update

## Baxter Street to E Stonewall Street

## Wastewater

### Pipe Replacement Project

JANUARY 2022 PROJECT UPDATE

# Baxter Street to E. Stonewall Street Wastewater Replacement Project

**WHAT:** Contractors for Charlotte Water continue constructing an important wastewater project in the Uptown area that will expand the future capacity of the wastewater system in the growing central business district.

Since the work began on Phase 2 of the project in September 2020 (see map), crews have tunneled under the streets and installed tunnel shafts in the road along Baxter Street, S. McDowell Street and E. Stonewall Street.

**WHEN:** Phase 2 is ongoing and expected to be completed in summer 2022. Please note there will be varying levels of activity along the project alignment, and schedules are subject to change due to weather and other conditions.

**WHERE:** Crews are currently working at the intersection of E. Stonewall Street and S. Alexander Street and will then move to S. McDowell Street and then S. Alexander Street.

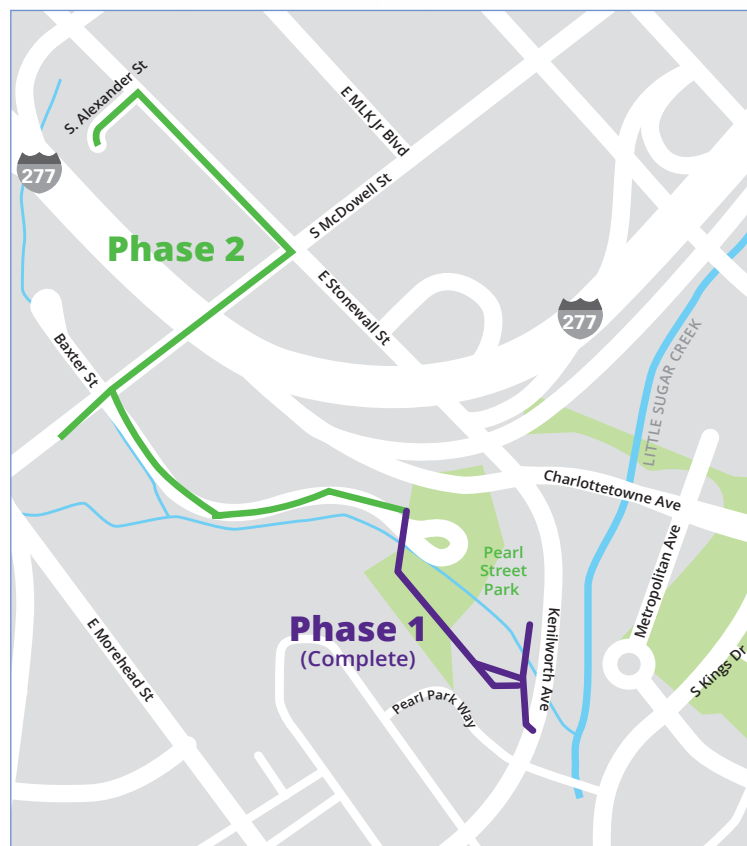

## WHAT TO EXPECT:

**Lane closures and detours around work** – E. Stonewall Street and S. Alexander Street have lane closures in place until summer 2022. Rolling lane closures and detours may be in place as work progresses along S. McDowell Street and S. Alexander Street. Local business access will continue to be maintained throughout construction.

**Construction equipment and materials** – Crews will move equipment, pipe and other materials along the project site throughout construction.

**Tunnel preparation and construction** – Crews will construct entry and exit shafts and tunnel in between to reduce impact to properties and motorists.

**Construction traffic** – Dump trucks will travel along the alignment, within the easements and roadways.

**QUESTIONS:** Please visit the project webpage at [www.charlottewater.org](http://www.charlottewater.org) (click on "projects") for updates on progress. If you have questions, please contact project manager Bill Deal, (980) 722-0786.
